Programėlės sukūrimas	5
FvsEStore konfigūravimas	7
Kliento informacijos skaitymas.....	8

Reikalavimai

- Reikia turėti amazon pardavimų planą „Professional“, planas „Individual“ neleidžia prieigos prie Amazon sistemų.
- Amazon skirsto parduotuves į tris regionus, norint integruotis su parduotuvėmis esančiomis tame regione reikia turėti „Profesional“ planus konkrečiame regione.

Amazono regionai

- NorthAmerica – Jungtinės Amerikos Valstijos, Kanada, Meksika, Brazilija
- Europe – Didžioji Britanija, Vokietija, Prancūzija, Italija, Nyderlandai, Švedija, Lenkija, Ispanija, Egiptas, Turkija, Jungtiniai Arabų Emyratai, Indija
- FarEast – Japonija, Australija, Singapūras

Registracija

Norint naudotis sąsaja reikia užsiregistruoti kaip programų kūrėjui, žemiau pateikiami žingsniai kaip tai atlikti.

1. Einam į meniu punktą ‘Apps & Services’ -> ‘Develop Apps’ ir užsiregistruojam kaip programų kūrėjai (Paveikslas 1)
2. Užpildom registraciją pagal pavyzdį (Paveikslas 2 ir Paveikslas 3)
3. Laukiame kol Amazon sistema patvirtins registraciją.

- Develop Apps**

Paveikslas 1

Developer Profile

Developer Profile collects your organisation's contact information, information about the data you require in Seller Partner API, and security and use information to ensure your compliance with Amazon's [Acceptable Use Policy](#) and [Data Protection Policy](#). If you are an Amazon Marketplace Web Service developer with multiple developer IDs, you do not need to submit a separate Developer Profile for each developer ID.

Once you have completed the Developer Profile, Amazon will evaluate your information and create a case with next steps. You may be asked to provide additional information or documentation, so please complete all fields truthfully and accurately.

Data Access

Please select the option that best describes your organisation

Note that your answers represent your organisation

My organisation sells on Amazon and I only want to integrate to manage my own business only

If you are currently an MWS developer, please provide your organisation's developer ID(s)

Please include all of your organisation's developer IDs separated by a comma. Note: If you are an Amazon Marketplace Web Service developer with multiple developer IDs, you do not need to submit a separate Developer Profile for each developer ID.

Example: 123456789123 987654321987

Roles

Roles determine access to Selling Partner API. Role definitions can be found [here](#)

Note: Restricted roles contain Personally Identifiable Information (PII) about Amazon Buyers and you will be required to provide additional information about your data use and security controls.

- Product Listing**
Create and manage product listings, including A+ content.
- Pricing**
Determine list prices and automate product pricing.
- Amazon Fulfilment**
Send to Amazon, and Amazon delivers directly to customer. Includes Fulfilment by Amazon.
- Buyer Communication**
Manage messaging to and from Amazon buyers.
- Buyer Solicitation**
Solicit Amazon buyers for feedback.
- Selling Partner Insights**
View information about the Amazon Selling Partner account and performance.
- Finance and Accounting**
Produce account and financial statements. Does not include information required to generate tax invoices.
- Inventory and Order Tracking**
Analyse and manage inventory. Does not include information required to generate shipping labels.
- Direct-to-Consumer Delivery (Restricted)**
Generate shipping labels and send Amazon orders directly to customers.
- Tax Invoicing (Restricted)**
Generate tax invoices to comply with tax regulation.
- Tax Remittance (Restricted)**
Calculate and remit sales taxes.

Use Cases

Describe the application or feature(s) you intend to build using the functionality in the requested roles.

Import orders to local crm system

Security Controls

Do you use network controls to prevent unauthorised access to Amazon Information?

- Yes
- No

Do you restrict access to Amazon Information based on users' job duties or business functions?

- Yes
- No

Do you encrypt Amazon Information in transit?

- Yes
- No

Do you have an incident response plan that covers monitoring, detection and response for potential threats and security incidents?

- Yes
- No

Does your incident response plan detect and handle Security Incidents and report Security Incidents to 3p-security@amazon.com?

- Yes
- No

List all outside parties with whom your organisation shares Amazon Information and describe how your organisation shares this information.

no

List all non-Amazon MWS sources where you retrieve Amazon Information.

no

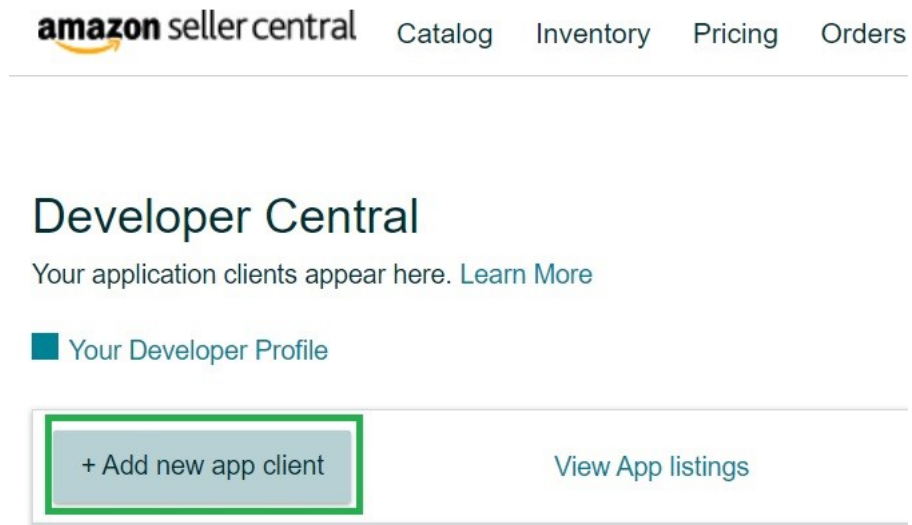

I have read and agree to the Marketplace Developer Agreement, Acceptable Use Policy and the Data Protection Policy

FvsEStore konfigūravimas

Sukonfigūrojame FvsEStore pagal pavyzdį 'Paveikslas 6'.

- Kiekvienam regionui reikia sukurti atskirą programėlę.
- *Client Identifier* ir *Client Secret* laukai paimami iš *LWA credentials*
- *Refresh Token* laukas sugeneruojamas 'Edit App -> Authorize -> Generate Refresh Token'

The image shows two overlapping screenshots. The top one is the AWS IAM console 'App clients' page. It has a table with columns: App name, Status, App ID, IAM ARN, LWA credentials, and Action. Two rows are visible: 'Finvalda' and 'FvsTest'. The 'FvsTest' row has a 'View' button highlighted with a green box. A dropdown menu is open for the 'FvsTest' row, showing 'Edit App', 'Create listing', and 'Authorise'. The 'Authorise' button is highlighted with a blue box. A green arrow points from the 'View' button to the 'Regionas' dropdown in the configuration window below. Another green arrow points from the 'Authorise' button to the 'Refresh token' field in the configuration window. A blue arrow points from the 'Authorise' button to the 'Galoja iki' field.

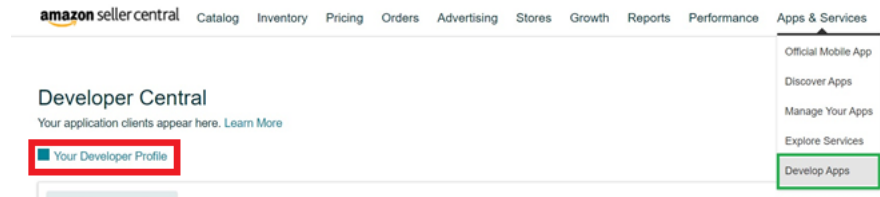

The bottom screenshot is a configuration window titled 'Konfiguratorius'. It has a sidebar with 'Operacijų kūrimas', 'Aprašymų kūrimas', 'Kita', and 'Veiksmai'. The main area is titled 'Naujas parametras' and 'Parametras'. It shows 'Parametras' set to 'FVSAMAZON' and 'Parduotuvė' set to 'Amazon'. The 'Autorizacija' tab is active, showing 'Regionas' set to 'Europe' (highlighted with a red box). Below are fields for 'Client identifier', 'Client secret', 'Refresh token', 'Access token', and 'Galoja iki' (set to '2021-06-16 16:51:00'). The 'Refresh token' field contains a long alphanumeric string. At the bottom, there are buttons for 'Info', 'Saugoti', and 'Baigti'.

Kliento informacijos skaitymas

Norint nuskaityti detalią informaciją apie klientą ir jo tikslų adresą privaloma užpildyti papildomą klausimyną ir atitikti Amazon reikalavimus. Tam atlikti reikia pakoreguoti vartotojo registraciją ir papildomai pasirinkti apribotus punktus (Paveikslas 7, Paveikslas 8). SVARBU – Jų patvirtinimas Amazon paskyroje gali užtrukti.

Amazon taiko gana griežtus reikalavimus dėl vartotojų duomenų saugojimo (turi ribojimus, kiek ilgai galima saugoti duomenis pvz. 3 mėnesius) ir apdorojimo. Todėl, jei sutiksite su Amazon reikalavimais dėl duomenų saugumo, už jų įgyvendinimą bus atsakinga pati įmonė, kurios vardu pildoma konkreti Amazon paskyra.

Paveikslas 7

- Direct-to-Consumer Shipping (Restricted)
Generate shipping labels and ship Amazon orders directly to customers.
- Tax Invoicing (Restricted)
Generate tax invoices to comply with tax regulation.
- Tax Remittance (Restricted)
Calculate and remit sales taxes.
